Professional Summary

Product-focused developer and consultant with experience building and iterating high-impact solutions using data analytics, customer feedback, and rapid experimentation. Proven track record in designing autonomous AI pipelines and backend workflows to solve complex operational challenges for global clients in various sectors including health & wellness, skincare, and cosmeceuticals. Experienced in taking high ownership in early-stage environments to drive product growth, enhancement, and management from product launch through to iteration and feedback, ensuring alignment with performance metrics and stakeholder dialogue.

Work Experience

Product Lead (Founding Team)

Sahindia Tech

11/2023 – 03/2025

- Led end-to-end development and growth of a responsive React-based web application (omegleapp.me ), scaling it to 2K concurrent active users through continuous feature optimization.
- Built and executed online marketing campaigns and grew a Reddit community to drive user acquisition and engagement. Incorporated real-time user feedback into agile development cycles, improving product functionality, retention, and overall user experience.

Freelance Product Consultant and Freelance Developer

Upwork

01/2022 – 10/2023

- Successfully completed 70+ client projects on Upwork with consistent 5-star client feedback.
- Acted as the primary point of contact, translating complex client requirements into actionable deliverables and technical strategies.
- Executed comprehensive QA testing for performance and functionality to ensure results met high-influence organizational standards.

Projects

Newsifai.com

- Engineered an autonomous AI news platform that clusters complex data sets and events to generate targeted summaries.
- Designed AI pipelines using vector similarity search and LLMs to provide real-time analytical content across multiple genres.
- Created backend workflows for source attribution and freshness filtering to ensure data integrity for end-users.

Visualsifai.vercel.app

- Orchestrated complex workflows using n8n and PostgreSQL to enable cost-efficient production across diverse formats.
- Developed an AI-driven platform that autonomously researches topics and generates high-scale video content using programmatic rendering.
