Professional Summary

Product-focused developer and designer with experience building and iterating user-focused digital products through rapid prototyping, user feedback, data analytics, and experimentation. Experienced in translating complex problems into intuitive product experiences and shipping solutions across frontend, backend, and AI workflows.

Work Experience

Freelance Product Consultant & Developer, *Upwork and direct clients* 11/2023 – 10/2026

- Completed 70+ client projects with consistent 5-star feedback from international clients, acting as the primary point of contact and translating complex requirements into actionable deliverables.

Productive Playhouse – QA Tester, AI Product Testing (current)

- Tested Google Gemini's notification feature, verifying delivery, display, and behavior across real usage scenarios.
- Tested Gemini's text summarization tool, evaluating the accuracy, completeness, and clarity of summaries against the source text.
- Documented issues in structured feedback to help improve AI product quality.

omegleapp.me – Developer & Growth Lead

- Worked on the end-to-end development and growth of a responsive React-based web application that scaled it to 2,000 concurrent active and 30,000+ total users.
- Incorporated real-time user feedback into agile development cycles, improving functionality, retention, and overall user experience.
- Built and executed online marketing campaigns and grew the social media community to drive user acquisition and engagement.

Expensify – Bug Reporting & Contributions

- Reported 50+ bugs and made 10+ contributions to Expensify.
- Executed QA testing for performance and functionality to ensure results met high standards.

Projects

Newsifai.com

- Built an AI-powered news platform that transforms large volumes of news data into personalized, structured summaries for end users.
- Designed and iterated AI pipelines using vector similarity search and LLMs to deliver real-time content across multiple genres.
- Built workflows for source attribution and freshness filtering to improve information quality and user trust.

Visualsifai.vercel.app

- Orchestrated complex workflows using n8n and PostgreSQL to enable cost-efficient production across diverse formats.
- Developed an AI-driven platform that autonomously researches topics and generates high-scale video content using programmatic rendering.
